

NEMATODES

STRENGTHEN THE ROOTS

Nematodes feast on unhealthy turf because the weak cell walls offer no defense. Strengthen the roots, increase the root mass, and give them the ammunition to fight the battle.

■ FLORADOX PRO

Contains the precursors to bolster all the plant's defense mechanisms.

■ ASTRON

Unique biostimulant package to increase root mass and micronutrients to enhance enzymatic activity.

■ PROTESYN

Promotes proper nitrogen utilization and mature protein production.

From the makers of:

Floratine's proprietary carbon translocation technology to enhance uptake and utilization of nutrients.
